Summary

I am a senior at Arizona State University (ASU Online), pursuing a Bachelor of Science in Computer Science while working part-time as an IT Consultant. I have also been working through the SANS Applied Cybersecurity (ACS) undergraduate certificate program. Always looking for opportunities to expand my Cyber knowledge and grow in the IS field!

Work Authorization

Authorized to work in the US for any employer

Work Experience

Information Technology Consultant

TechInSF Consulting • San Francisco, CA

October 2026 to Present

We partner with Bay Area businesses to untangle their everyday IT setbacks and keep operations running without friction. I assist senior IT Consultants in the technical environment of business; from rolling out secure, reliable workstations to diagnosing Layer 1–3 network drops and keeping endpoints stable and secure.

Advanced Repair Technician

Geek Squad • San Francisco, CA

May 2026 to October 2026

Perform component-level hardware diagnostics, OS deployments, and physical repairs across Windows and macOS environments. we also execute data recovery protocols, malware remediation, and system hardening to restore compromised devices and protect client data, all while translating technical diagnostics and root-cause analyses into actionable, user-friendly language for clients.

On-Demand IT Deployment Specialist

Murphy McKay & Assoc • San Jose, CA

February 2026 to September 2026

Operate on a project-based, on-demand deployment schedule to assist Fortune 500 clients with high-volume hardware migrations and system audits.

Store Manager

Starbucks • Emeryville, CA

October 2017 to April 2026

Oversee daily store operations, lead barista teams, and ensure efficient shift execution while maintaining high service standards.

Education

Information Security (Applied Cybersecurity Certificate)

SANS - Cybersecurity Institute • Remote

September 2026 to Present

Computer Science (Bachelor's degree)

Arizona State University-Tempe

August 2022 to Present

- Information Assurance: Developed strong system-level security analysis and problem-solving skills through hands-on CTF challenges. Topics included Linux command-line operations, reverse engineering, cryptography, and web security.
- Software Engineering (Java): Co-developed a role-based educational management system using MVC architecture, finite state machine validation, and custom testing frameworks.

- Computer Organization & Assembly: Developed a fundamental understanding of low-level system operations and hardware-software interfacing.

Licenses and Certifications

Codepath Intermediate Cybersecurity

May 2026 to Present

I completed a rigorous, hands-on 10-week program focused on Blue Team operations and defensive security. I developed technical proficiency in incident response, network traffic analysis, and vulnerability management through lab-based simulations. I also gained experience utilizing industry-standard tools and frameworks, including the MITRE ATT&CK framework, to identify and mitigate sophisticated security threats.

CompTIA A+

March 2026 to March 2029

Validated expertise in configuring, installing, and troubleshooting hardware, peripheral devices, operating systems (Windows, Linux, macOS, ChromeOS), and networks.
